

Installing WordPress

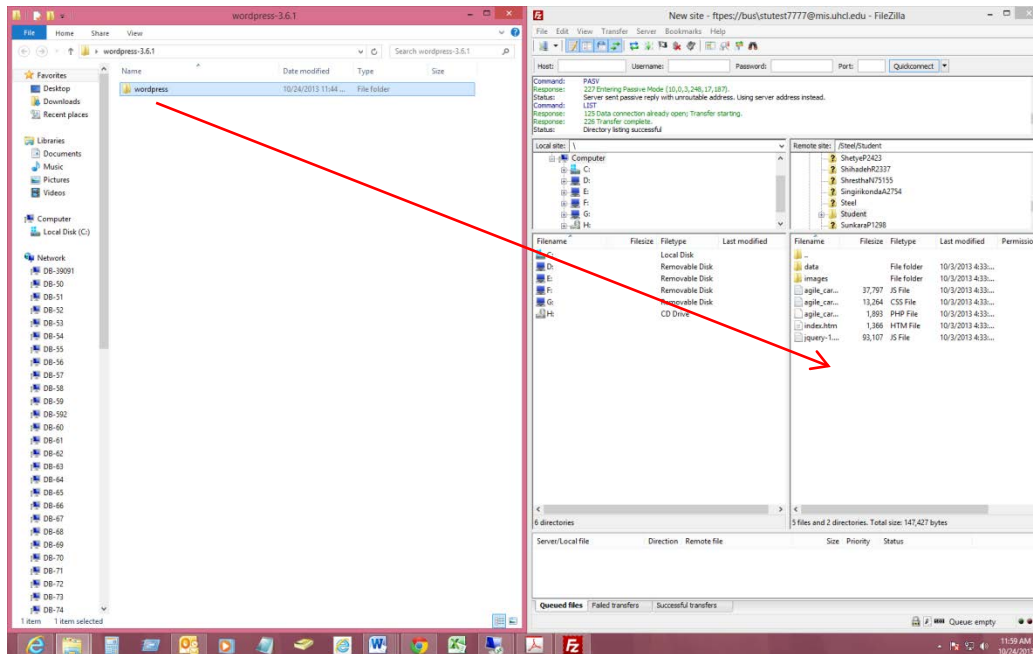

- 1) Download WordPress (<http://wordpress.org/download/>) and save zip file to your computer. (fig 1)

- 2) Extract the WordPress zip folder. Inside extracted folder you will see a "WordPress" folder. (see below) (Zip file will not load onto server through Filezilla)

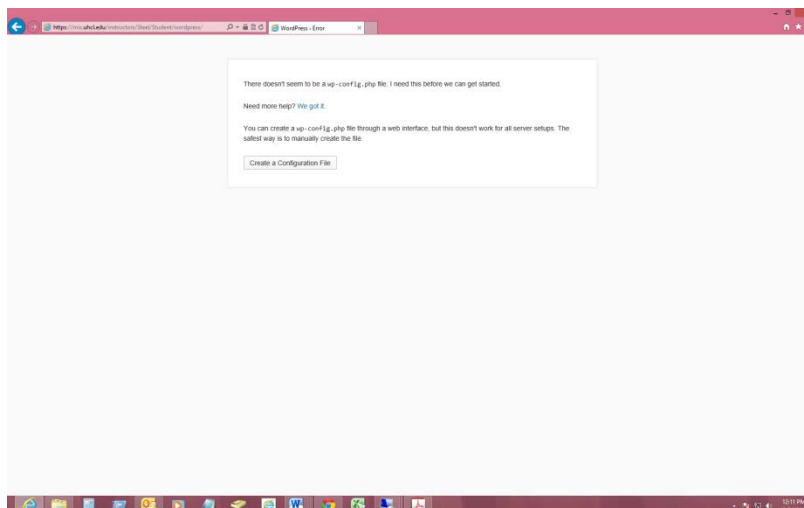

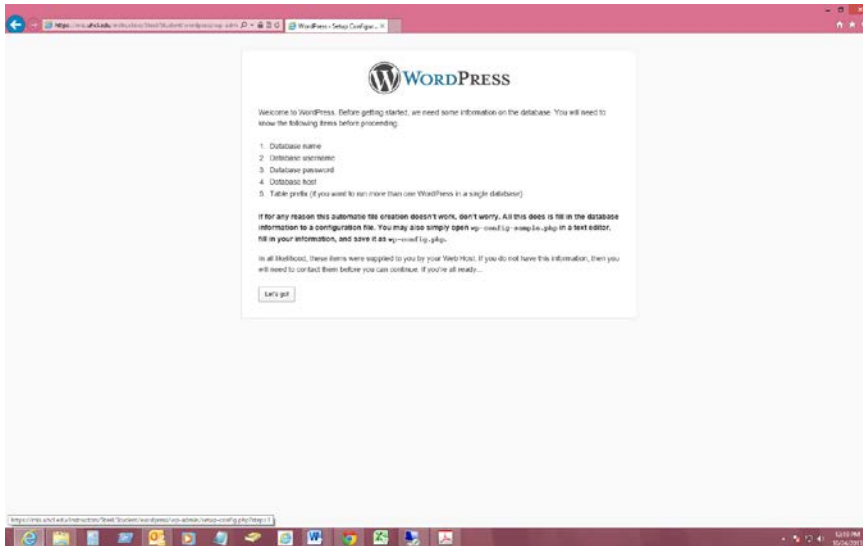

- 3) Use Filezilla (instructions at <https://mis.uhcl.edu/TaDocs/SSL-Filezilla.pdf>) to upload the complete “WordPress” folder (extracted folder only) into your application directory (drag/drop shown in by arrow below). (May take up to 10 minutes)

- 4) Once upload completed, go to <https://mis.uhcl.edu>
 Hover over “Coursework”
 Click on “Dr.Steel”
 Enter your username (example: bus\smithw2376) and password
 Click on your folder and then type “wordpress” at the end of the URL and press “Enter”
<https://mis.uhcl.edu/instructors/Steel/smithw2376/wordpress>

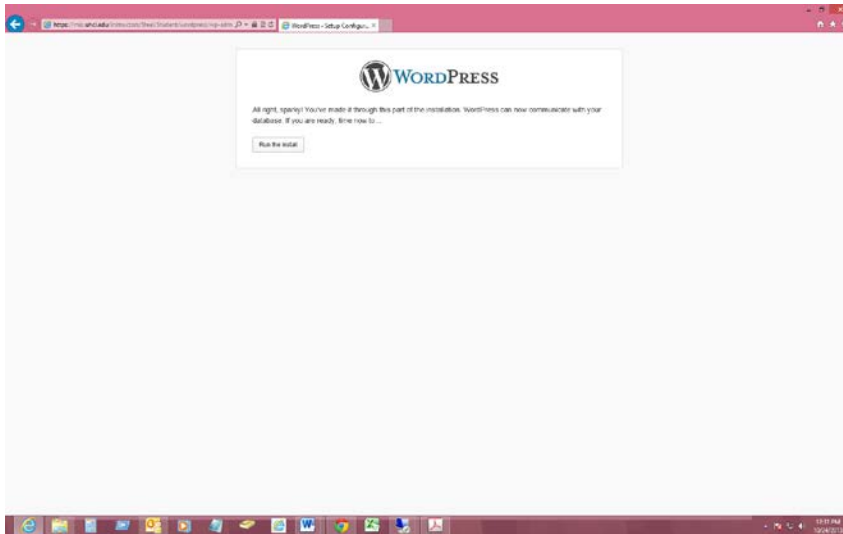

- 5) Click on the “Create a Configuration File” button then “Lets Go” button (Student pictures below)

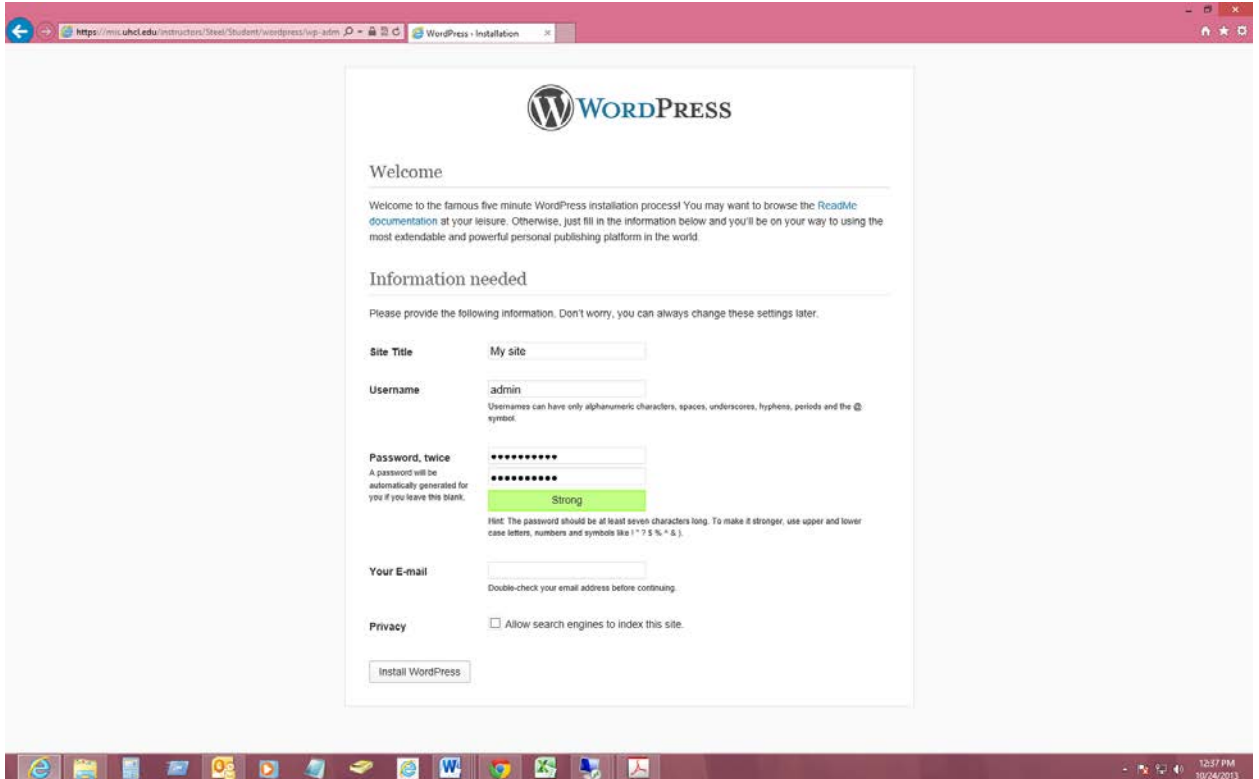

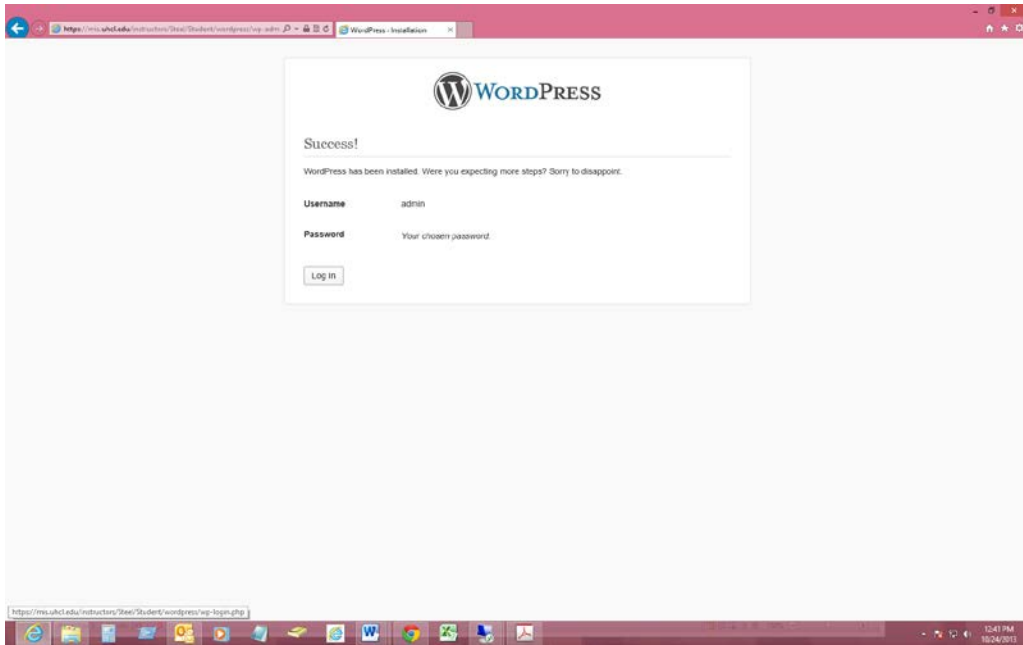

- 6) Enter the following information: (all lowercase)
- Database Name:** your student account name (example: **smithw7239**)
 - User Name:** your student account name (example: **smithw7239**)
 - Password:** your 7 digit UHCL id #
 - Database Host:** **70.141.118.202** or **mis-sql.uhcl.edu**
 - Table Prefix:** **wp_**
- Click "Submit"
- Next Click "Run the install"

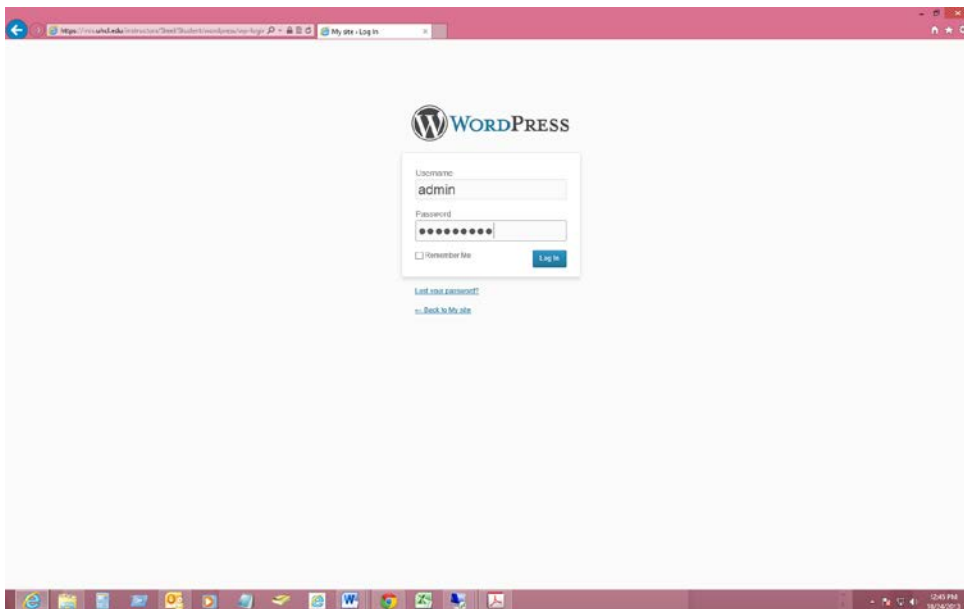

- 7) Enter a Site title for your WordPress site.
Username: Create a username for your admin account
Password: Create a password for your admin account
Email: Enter any email address
Uncheck "Allow search engine to index this site"
Click "Install WordPress"
Click "Log in"

- 8) Username: **created on step 7**
Password: **Created on step 7**
Click "Log In"

9) WordPress has now been installed. See defaulted admin page below.
